

Plaster Gauze

What is plaster?

Plaster is a soft mixture of lime with sand or cement and water for spreading on walls, ceilings, or other structures to form a smooth hard surface when dried.

Plaster Gauze

Plaster added to gauze makes the plaster less messy and easier to handle.

Getting "stuck" on plaster.

You need a release between the surface you are casting and the plaster gauze or else the plaster will stick to the surface.

Where not to put
wet plaster...

Where to rinse
plaster actually...
